DM2 Software Latest *Petroleum Insights* ERP System Release Supports Fixed Assets Management

*Leveraging Sage's New MAS 90 and 200 Extended Enterprise Suite,
DM2 Simplifies Fixed Assets Management for Petroleum Marketers*

VANCOUVER, WA, January 6, 2009 — DM2 Software, Inc., a leading provider of business-management software solutions to the petroleum-distribution and convenience-store industries, is pleased to announce that Sage's FAS (Fixed Assets) Asset Accounting solution is now available in its latest release of *Petroleum Insights*. DM2's *Petroleum Insights* system is based on Sage Software's new MAS 90 and 200 Extended Enterprise Suites (EES). As a Sage Master Developer and Reseller, DM2 uses the MAS 90 and MAS 200 ERP (enterprise resource planning) systems designed for general wholesale distribution applications to develop, sell and support a complete system designed specifically for petroleum-distribution applications. Now DM2 Software's customers can simplify their fixed assets accounting and management with the new V4.3 EES release of *Petroleum Insights*.

The FAS Asset Accounting solution provides easy-to-use fixed-asset accounting, depreciation and reporting features for businesses, governments, schools and non-profit organizations. Standard and customizable depreciation calculation methods help businesses and organizations optimize balance sheets, reduce insurance overpayments and maximize tax savings. FAS conveniently manages assets throughout their lifecycle—from acquisition to disposal—and will provide a wealth of benefits quickly. Built-in security ensures that users can only access the information they need based on their role in the company.

With a comprehensive depreciation engine containing more than 300,000 IRS and GAAP rules, FAS Asset Accounting makes managing the entire life cycle of your company's fixed assets fast, easy and accurate. FAS Asset Accounting eliminates the time and energy it takes to manually perform the necessary accounting procedures, allowing you to focus on other tasks. FAS versions are available to meet the specific needs of your organization—from stand-alone, single-user and multi-user to the fully integrated EES version. FAS Asset Accounting can be customized to work to meet the specific needs of any business process with user-definable fields, "Smart Lists," Asset Templates and much more.
