DM2 Software Celebrates its 20th Anniversary

DM2 has been providing software solutions to the petroleum-marketing industry since 1989

VANCOUVER, WA, October 5, 2009 — DM2 Software, Inc., a leading provider of back-office/ERP software solutions to the petroleum-distribution and convenience-store industries, celebrates its 20th anniversary this month. With the strong foundation Sage MAS90 and 200 provides, DM2 can focus its development efforts on designing, developing and supporting applications tailored to meet the needs of the petroleum-marketing industry.

Incorporated in October 1989, DM2 started out providing CardLink, a cardlock billing system. By 1991, DM2 realized that many petroleum marketers lacked a complete accounting and petroleum-marketing system for their businesses. Today, DM2 offers all of the core financials (everything from general ledger, accounts payable and accounts receivable to bank reconciliation, inventory, purchase order and sale-order management applications), supply-chain automation, advanced business analytics, customer-relationship management, fixed assets, paperless office and e-Business modules that petroleum marketers need to manage and grow their businesses.

“We are extremely proud of what we have accomplished in the past twenty years,” said Scott Burkard, President, DM2 Software, Inc. “We are looking forward to an even stronger future serving the petroleum-marketing industry. Our knowledge of the industry has continually grown over the years and we are uniquely positioned with this knowledge and our resources to continue providing the high level of service and support to which our customers have become accustomed.”

As a testimony to DM2’s success, DM2, a Sage MAS90 and MAS200 Master Developer and Reseller, has been a Sage President’s Circle (top 10 reseller). DM2 has won this coveted award for the past 10 years and is currently Sage’s No. 1 reseller for new software licenses. The Sage Group, plc, is a world-leading supplier of accounting and business management software to small and medium-sized businesses (SMBs). Sage’s mission is to help SMBs run their businesses more effectively, helping them to gain greater insight into their business activities and providing them with lasting benefits by automating their business processes.
