- ⊙ True Cents/Gallon Gross Margin Reporting

Supported Equipment:

- ⊙ PetroVend
- ⊙ GasBoy

Supported Cardlock Networks:

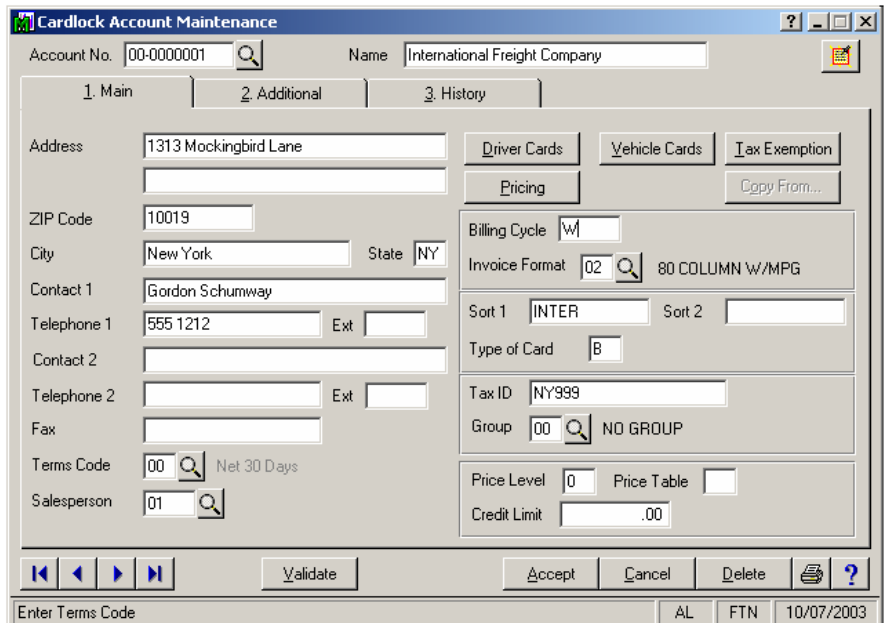

- ⊙ CFN
- ⊙ Pacific Pride Network
- ⊙ Proprietary networks

DM2 CardLink® is the most widely used cardlock/automated fuel billing software in the world. CardLink combines world class accounting software in MAS 90 and MAS 200 with the most comprehensive cardlock billing feature set available to date.

With the Autopoll feature, you can capture fueling transactions at any time of day or night from all your remote sites. Once gathered, a variety of rules are available to price these transactions such as "cost plus", OPIS, "retail plus/minus", or volume discount. Then your federal, state, and local taxes are applied.

Your invoices can group fueling transactions by card or vehicle and also provide helpful data like "cost per mile", MPG, and total miles driven.

Billing cycles can be daily, weekly, semi-monthly, or monthly.

FEATURES

Polling	DM2's Autopoll communications software can automatically capture fueling transactions from any number of sites at a predefined time. You can also retrieve tank gauge data such as inventory levels and alarm reports at the same time.
Tax Reporting	Complete federal, state/province, and local tax reporting includes excise and sales taxes. Customer tax exemptions can be applied by account, card or vehicle.
Pricing	Pricing options include: rack plus, OPIS, SCPC, retail +/-, volume discounts and can vary by customer or fueling site. Unlimited special pricing brings unprecedented flexibility for establishing your own pricing and margin levels and handling fixed, contract, or group pricing.
On-Time Discount	Create incentives for On-Time Payments by establishing percentage or cents/gallon discounts.
Customer Analysis	Standard reporting shows 24 months of history by customer and by customer/by product. Cents/gallon gross profit reports are net of taxes. Customer rankings by sales shows where your business is growing and helps you become more competitive.
Card Management	Enter and edit card information in CardLink for automatic update of your remote card system.
Credit "Watch"	Manage your credit exposure with automatic credit warnings that show when a customer's balance is within 10% of their credit limit including unbilled transactions.
Transaction History	Reprint customer transactions by account, card or invoice number for any date range.
Night Fueling/Wet Hosing	Optional add-ons allow night fueling or "wet hosing" transactions from a variety of capture devices such as Midcom, F-RAMS, Symbology or AWE.
Account/Card Move	Respond to change by Automatically moving a card and all its transactions to another account, or keep the card and transfer the transactions from one card to another.
