

DM2 Software Truck Automation Interfaces

DESIGNED FOR:

**Sage
MAS 90
MAS 200**

Interface Features:

- Interfaces are available for AWE, F-RAMS, MID:COM SMARTLogix, Symbology and TelaPoint systems
- Automatically send Sales Orders to Dispatch and Driver Handhelds
- Orders can be entered in either system and automatically synchronized
- Credit Checks regardless of how orders are entered
- Orders created in DM2 Dispatch Scheduler can be automatically sent to the truck system
- Includes Shipping Instruction memos
- Order changes in DM2 are automatically sent to the truck system depending on order status
- Automatically populate Bill of Lading information from the truck system
- Provides summary or detail transaction information for fleet fueling invoicing

DM2 Software - since 1989, DM2 has been developing and supporting back office/ERP systems specifically designed to provide petroleum marketers with the tools they need to automate their operations and maximize profit margins. DM2 has taken truck automation to the next level. DM2's Truck Automation Interfaces keep your petroleum distribution operation running smoothly by simplifying dispatch and tracking product movement throughout the entire delivery process. Accurate inventory information and exception reporting are just a few benefits this feature-rich solution has to offer. By adding the Truck Automation module to your DM2 *Petroleum Insights* back office/ERP system, you can further streamline your delivery and fleet fueling operations while improving your cash flow.

Streamline operations and eliminate double entries and keying errors by automatically sending priced and taxed orders from the MAS90/MAS200 Sales Order module to the truck system's Dispatch module and Handheld driver units. Or, enter orders into the Dispatch module or on the handheld units. Either way, both systems are automatically synchronized and credit is checked. Provide fleet (wet hosing) accounts with consolidated, summary invoices via the Sales Order module or send per vehicle transaction information to DM2's CardLink module for detailed invoicing.

Improve cash flow by updating the Sales Order module after each delivery is made. Operators can easily see which deliveries are ready to be billed and select and convert orders into invoices with just a few mouse clicks.

The screenshot displays two overlapping windows from the DM2 software. The background window is titled 'Sales Order Entry' and shows a form with fields for 'Order Number' (0006107), 'Copy from', 'Quick Print...', 'Defaults', 'Customer...', and 'Credit...'. Below these are tabs for '1 Header', '2 Address', '3 Lines', and '4 Totals', along with a 'User ID' field containing '004'. The main area contains a table with columns for 'Item / K3 Number', 'Description', 'White', 'PL', 'U/M', 'Ordered', and 'U/L'. A single line is visible with '000 GAL 500.000'. Below the table are buttons for 'Ins', 'Del', 'Quick Line', and 'Fuel Taxes...'. The foreground window is titled 'Import/Export deliveries' and has two buttons: 'Import deliveries into MAS90' and 'Export deliveries from MAS90'. A dropdown menu shows 'MIDCOM'. Below are fields for 'File Path' (c:\3712\mas90) and 'File Name' (R1001.dat), with a checkbox for 'Route through Bill of Lading'. At the bottom are buttons for 'Generate Invoices', 'Edit Import Records', and 'Proceed'. The status bar at the very bottom shows 'AL ESS 11/24/2003'.

DM2 Software

Truck Automation Interfaces

BENEFITS

Eliminate Manual Entries

Eliminate double entries and keying errors by automatically populating Customer Account or ShipTo addresses, Sales Order, Bill of Lading and Inventory Item Maintenance screens between systems.

Improve Inventory Control

Maintains inventory control by interfacing your back-office/ERP system with your truck automation system.

Increase Cash Flow

Reduce time from delivery to invoice by automatically capturing delivery information.

Increase Margins

Increase dollar margins per gallon delivered by identifying *Best Buy* pricing opportunities and maximizing delivery routing.

Reduce Paperwork

Eliminate the paperwork associated with order entry, dispatch and delivery functions.

ABOUT DM2

DM2 Software, Inc. was incorporated in October 1989, DM2 started out providing CardLink, a cardlock billing system to the growing cardlock networks in the west. By 1991, DM2 realized many petroleum marketers lacked a complete accounting and petroleum marketing system for their businesses. Today, DM2 offers *Petroleum Insights* a back-office/enterprise resource planning (ERP) system with all of the core financials (everything from general ledger, accounts payable and accounts receivable to bank reconciliation, inventory, purchase order and sale order management applications), supply chain automation, advanced business analytics, customer relationship management, c-store management, fixed assets, paperless office and e-Business modules that petroleum marketers need to manage and grow their businesses.

Features may vary based on the truck automation system you are using. Check with your truck automation system provider to confirm available functionality.

For additional product information, or to arrange for an in-depth demonstration or place an order please contact DM2 Sales at 800.866.5151.

AVAILABILITY:

MAS 90 or MAS 200
Version 4.05 or later
